We detected that JavaScript is disabled in this browser. Please enable JavaScript or switch to a supported browser to continue using twitter.com. You can see a list of supported browsers in our Help Center. Help Center We've gotten a number of bug reports from people who use third-party tools to hack their games to give themselves off infinite items or god. Keep in mind that Crashlands has a lot of complex, includes mechanisms to make the infinite stock job, and using one of these third-party tools will almost certainly corrupt your storage file or break it in terrible ways. If you're using one of these hack tools, you're on your own. Please do not report errors after using either of these. You made your bed, so you lie in it. And more importantly, don't make me an afternoon trying to figure out why your rescue has become mysteriously damaged, when there are people with current, legitimate bug reports waiting in the wings to get their fixed stuff.
